Top Secret - Model and terminal class diagram

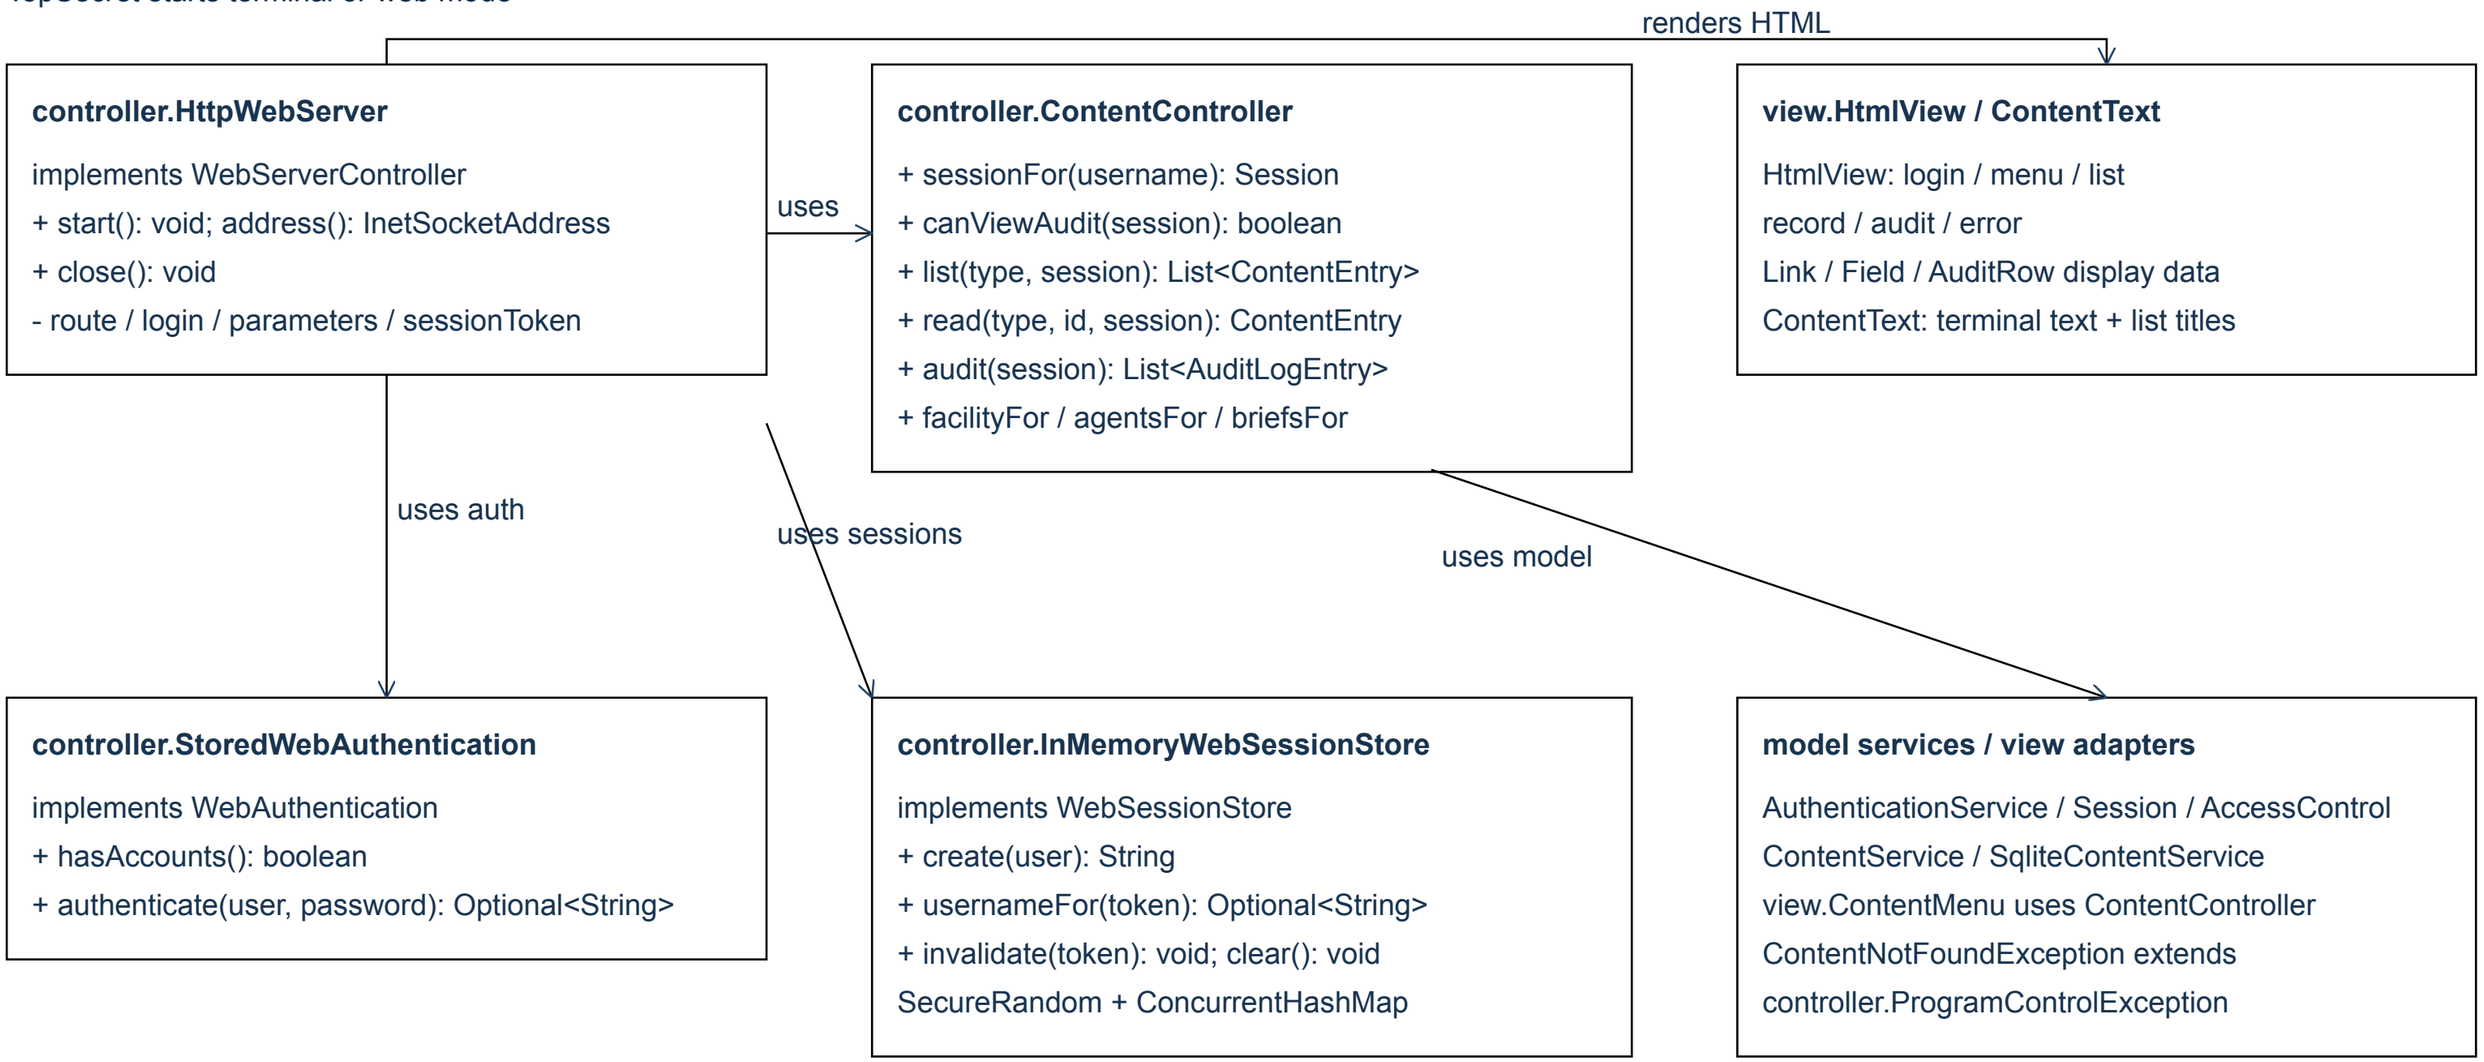

Current implementation snapshot

See interface-design.txt and content-model.txt for contracts, integrity rules and regression steps.

Top Secret - MVC and HTTP controller classes

TopSecret starts terminal or web mode

controller: LaunchMode {TERMINAL, WEB, CHANGE_PASSWORD}; fromArguments(args): LaunchMode

WebServerController: PORT=3002; SESSION_COOKIE=TopSecretSession; extends AutoCloseable

Session cookies have no Expires/Max-Age at login. Logout/restart invalidate in-memory sessions.

Model owns access rules; the web controller supplies display data to HtmlView.
